PROFESSIONAL SUMMARY

AI Engineer and Computer Science graduate (2025) with hands-on experience building LLM-powered pipelines, RAG and GraphRAG systems, and Agentic AI workflows using LangChain, LangGraph, FAISS, and Neo4j. Skilled in designing multi-step AI agents, knowledge-graph retrieval pipelines, and end-to-end ML/DL solutions across NLP and computer vision, with a track record of deploying production-grade AI applications via Streamlit, FastAPI, Docker, and Hugging Face Spaces.

CORE SKILLS

Agentic AI & LangGraph LangChain, LangGraph, Multi-Agent Systems, Tool-Calling, Agent Orchestration	RAG Pipelines FAISS, Retrieval-Augmented Generation, Document Chunking, Embeddings	Knowledge Graphs Graph Knowledge Representation, Entity Relations, RAG + KG Integration
Machine Learning Logistic Regression, Decision Trees, Supervised & Unsupervised Learning, Evaluation Metrics, Scikit-learn	Deep Learning & CV TensorFlow, CNN, Transfer Learning, YOLOv8, Image Augmentation, Object Detection	NLP & GenAI NLTK, spaCy, BERT, LangChain, LLMs, Gemini, GPT, Prompt Engineering
LLMs & Prompt Engineering Gemini, GPT, BERT, Chain-of-Thought, Few-Shot Prompting, Prompt Design	Python & Frameworks Python, TensorFlow, YOLOv8, spaCy, NLTK, Streamlit, Hugging Face	Databases & Platforms MySQL, FAISS Vector Store, GitHub, Jupyter, Google Colab, HF Spaces
Python Programming - Data Structures (Lists, Dictionaries, Sets, Tuples) - Object-Oriented Programming (OOP) - File Handling - Exception Handling		

PROJECTS

AlgoPilot — Agentic DSA Chatbot	<i>LangChain · RAG · FAISS · Gemini LLM · Streamlit</i>
- Built a domain-specific agentic chatbot using a complete RAG pipeline: document ingestion, chunking, FAISS vector store indexing, and Gemini LLM-powered retrieval and response generation. - Implemented LangChain agent orchestration with tool-calling to intelligently route queries across a curated DSA PDF knowledge base; deployed as a live app on Hugging Face Spaces using Streamlit.	
QueryGenius — Intelligent Q&A System	<i>LangChain · Prompt Engineering · Streamlit</i>
- Designed an intelligent Q&A system leveraging advanced prompt engineering techniques including chain-of-thought and few-shot prompting with LangChain for accurate, context-aware multi-step reasoning. - Built and deployed an interactive real-time Streamlit interface on Hugging Face Spaces enabling seamless user query resolution.	
Bollywood GraphRAG — Knowledge Graph Q&A System	<i>Neo4j · FastAPI · Streamlit · GPT-4o · Docker</i>
- Built a GraphRAG pipeline on a Neo4j knowledge graph of Bollywood movies, actors, directors, and awards, combining vector embeddings with graph traversal for context-aware, GPT-4o-powered answers. - Designed a FastAPI backend for the GraphRAG pipeline and a multi-page Streamlit chat/explorer frontend; containerized the full stack with Docker Compose for one-command deployment.	

EDUCATION

B.Tech — Computer Science & Engineering	2021 – 2025
Sree Chaitanya Institute of Technological Sciences, Karimnagar CGPA: 7.0 / 10	
Data Science Program (Advanced)	2025
Innomatics Research Labs, Hyderabad Python, ML, Deep Learning, NLP, GenAI, Computer Vision	

CERTIFICATIONS

Data Science Program · Machine Learning · EDA · Power BI · SQL — <i>Innomatics Research Labs</i>
