AI Engineer / Agentic AI / RAG & LLM Systems

SUMMARY

AI Engineer with hands-on experience building LLM-powered pipelines, RAG systems, and Agentic AI workflows using LangGraph and LangChain. Skilled in production deployment via Docker and CI/CD. Seeking the AI Engineer internship at Reknew to deliver scalable AI solutions.

key Skills

Python :Data Structures (Lists, Dictionaries, Sets, Tuples), Object-Oriented Programming (OOP), File Handling
Exception Handling, Synchronous and Asynchronous

Machine learning : XGBoost , scikit-learn, Linear models, Random Forest, Decision Forest,

Deep Learning: Activation, Backpropagation, LSTM, CNN, RNN, TensorFlow

RAG : RAG Pipelines, GraphRAG, CRag, Agentic Rag, Hybrid Rag

LLMs & GenAI: GPT-3/4, Gemini 2.5 Flash, RAG, LLaMA, Prompt Engineering sdk, LangChain, Pinecone, ChromaDB, Neo4j, GraphRAG, multi-hop reasoning

Agentic AI: LangGraph, multi-agent orchestration, Tool Use, HITL, streaming, persistent memory

Dev & Deployment: Python, FastAPI , Streamlit , Docker, GitHub Actions CI/CD, Hugging Face Spaces, Render

PROJECTS

Agentic Chatbot with LangGraph / *LangGraph, LangChain, LangSmith, RAG, Docker, GitHub Actions, Render*

- Built end-to-end production Agentic Chatbot with persistent memory, streaming responses, chat threading, and external Tool Use.
- Integrated RAG pipeline within agentic workflow; added HITL control; monitored via LangSmith; deployed on Render via Docker & CI/CD.

HealthSphere AI — Medical Chatbot / *LangChain, Pinecone, Gemini 2.5 Flash, RAG, Streamlit, Hugging Face*

- Built RAG-powered medical chatbot to answer health queries from PDFs using Pinecone for semantic search and Gemini 2.5 Flash as LLM.
- Deployed publicly on Hugging Face Spaces with Streamlit frontend.

Multi-Source GraphRAG Knowledge Assistant / *Neo4j, LangChain, ChromaDB, LLMs, Knowledge Graphs*

- Ingested research papers, GitHub repos, and technical docs into a unified knowledge graph with automated LLM-based entity/relation extraction.
- Implemented hybrid retrieval combining Neo4j graph traversal and vector search for multi-hop reasoning and context-aware Q&A.

EDUCATION

Innomatics Research Labs	Hyderabad
<i>Data Science Program</i>	2026
- Coursework: Python, Statistics, ML, DL, GenAI, NLP, Computer Vision, LangChain, Agentic AI	
CMR Technical Campus	Hyderabad
<i>B.Tech — Computer Science Engineering with Data Science</i>	2025

CERTIFICATIONS

Machine Learning · Data Analysis · Deep Learning · Exploratory Data Analysis *Innomatics Research Labs*
